

PCB Management, Compliance & Liability Assessment
August 5 - 6, 2008
Plymouth Congregational Church
1217 Sixth Avenue, Seattle, Washington 98101

Agenda

Tuesday, August 5th

8:30 Welcome and Announcements

Morning Session (with Breaks) – New Issues PCB Management Fundamentals

- The latest news from EPA Headquarters
- History of the PCB regulations (how did we get here?)
- Future of the PCB regulations (where are we going?)
- Reviewing the basics for new PCB program personnel
- Understanding the regulations (key terms and interpretations)

Noon Lunch

1:00 pm Afternoon Session (with Breaks) – Preparing for an EPA Inspection

- What are the most common things EPA inspectors look for?
- Self-auditing (what issues should your company prioritize)
- Liability vs. compliance (which might harm your company more?)
- Managing pole yards, spare equipment and storage areas
- “Storage for Reuse” vs. “Storage for Disposal”
- Does your company understand and follow EPA’s “assumption rules”?

4:30 pm Adjourn

Agenda

Wednesday, August 6th

8:30 am Morning Session (with Breaks) – PCB Spills (Response, Remediation & Reports)

- What is a PCB “spill” vs. a PCB “leak”?
- When are PCB spills reportable to the EPA &/or State?
- Understanding the importance of spill “response” (not just cleanup)
- The EPA’s “National PCB Spill Cleanup Policy”
- The EPA’s “PCB Remediation Waste Cleanup Options”
- Dealing with PCB spills in emergency conditions and adverse weather

Noon Lunch

1:00 pm Afternoon Session (with Breaks) –Advanced PCB Issues & PCB Record-keeping

- Double Encapsulation Options for Porous Surfaces
- Decontamination Options and Methods
- “Sale/Transfer for Reuse” of PCB Articles
- “Storage for Reuse” records and “Storage for Disposal” inspections
- Understanding the new “Uniform Hazardous Waste Manifest” for PCBs
- Compiling your EPA-required “PCB Annual Document Log and Summary”
- How long should PCB records be kept on file at your company?

4:30 pm Adjourn
