

## ASTM STANDARD GUIDE FOR GREENER CLEANUPS TRAINING IN REGION 9

### Guide and Tools for Greener Cleanups

This training provides an overview of Greener Cleanups, and explains how project managers and responsible parties can use the ASTM Standard Guide for Greener Cleanups to reduce the environmental footprint at cleanup sites. EPA experts will provide an in-depth discussion on the process for selecting and implementing Greener Cleanups Best Management Practices (BMPs) that are provided in the ASTM Standard Guide. This training is relevant to the following cleanup programs: Superfund, Brownfields, RCRA Corrective Action, PCB Cleanups, and LUST sites, as well as State, Tribal, and Local programs. The training will include case studies of cleanup sites within EPA Region 9 where the ASTM Standard Guide has been applied. The training will also provide attendees with opportunities to share their experiences and ideas for implementing Greener Cleanups.

Registration link:

[www.trainex.org/GreenerCleanups](http://www.trainex.org/GreenerCleanups)

Seating is limited, early registration is encouraged

EPA Region staff may receive credit towards COR training
